COMPANY SURGEONS.

Dr. Roscoe C. Webb, Chief Surgeon.		
Office phone Main 7508, House Colfax	4101;	
1849 Medical Arts Bldg., 9th St. and N	icollet ave.,	
	Iinneapolis, I	linn.
Dr. H. M. N. Wynne,		· ·
Assistant Chief Surgeon	linneapolis, I	linn.
Dr. J. G. Cunningham,		
Assistant Chief Surgeon	Spokane, V	Vash.
Dr. H. E. Wheeler,	•	
Assistant Division Surgeon	Snokana V	Vach
		1 aon.
Dr. A. E. Gerhart,	TT	
Assistant Division Surgeon	wenatchee, v	vasn.
Dr. H. F. Craig,		
Assistant Division Surgeon	Marcus, V	Vash.
Dr. H. J. Knott.		
Division Surgeon, Cobb Bldg	Seattle. V	Vash.
Dr. L. S. Trask,	·····,	
Assistant Division Surgeon	Evorott V	Voch
Dr. R. W. Perry, Ophthalmic Surgeon	Seattle, V	vasn.
Dr. H. T. Rhoads, Ophthalmic Surgeon	Everett, V	Vash.
Dr. Frederick A. Kiehle, Ophthalmic Surgeo		
Dr. Carroll Smith, Ophthalmic Surgeon		

LOCAL SURGEONS.

Dr. M. A. Keyes Bellingham	bay. Address 3042 15th Ave. West, Seattle. Dr. H. L. Hopkins Leavenworth Dr. Minard AllisonMonroe Dr. D. A. Clark
Dr. E. HaydenCashmere	Vancouver, Wash.
	Dr. Geo. H. Clement
Dr. Carl L. Martin	
Skykomish	Vancouver, B. C.

G. E. Wellein, Chief Dispatcher, Seattle.

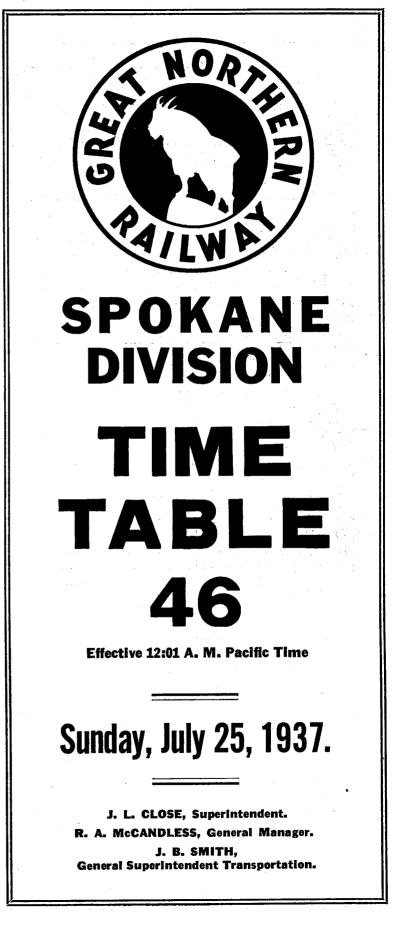

A. Kase, Chief Dispatcher, Spokane.

J. T. Fransen, Trainmaster. J. M. Budd, Trainmaster. F. V. Percival, Trainmaster.

I. E. Clary, Trainmaster.

C. A. Manthe, Superintendent Terminals.

÷

First Subdivision.

Extra trains may use double track with the current of traffic without running orders, provided they secure proper clearance card Form A from Superintendent.

Trains 1, 2 and 27 register by card at Hillyard.

*

 \mathbb{C}

4

Only first class trains and trains originating at Spokane Passenger Station will register and receive clearance card Form A.

First class trains register by card at Appleyard. Only First Class Trains, Passenger Extras, Nos. 381 and 382 will register at Wenatchee.

High voltage electric wires on eastward main track between Spokane Passenger Station, and connection with S. C. & P. Ry. east of Division Street bridge, and to transfer track on S. C. & P. Ry., and in Appleyard and between Appleyard and Wenatchee in some places will not clear man on top of train. Trainmen and Enginemen must use extreme caution when obliged to be on top of train.

Trains 1 and 2 stop at any station between Spokane and Seattle to pick up or discharge revenue passengers from or to points south of Shelby, and from or to points east of Havre where Nos. 1 and 2 are scheduled to stop.

Nos. 1 and 2 stop on flag at Ephrata to pick up or discharge revenue passengers from or to points Everett and West, Spokane and East.

MAXIMUM SPEED.

Within city limits, Spokane, All trains
Between Division St. and Monroe St., Spokane, All trains. 12 M.P.H.
Over Bridges 270 and 273, Spokane, Q-1, R and S-2
engines 10 M.P.H.
Over Bridge 274, Fort Wright, Q-1, R and S-2 engines 20 M.P.H.
Between Fort Wright and Lyons, Passenger trains
Between Lyons and Wenatchee, Passenger trains
Between Quincy and Crater, and between Vulcan and Co-

INTERLOCKING.

HILLYARD-Whistle Signals:

Eastward trains:-To Main Yard-1 long, 1 short.

To West Yard-1 long, 1 short, 1 long.

Both Westward and Eastward Trains:-To cross over to opposing track, 2 long, 1 short.

U. P. R. R. JCT .- Whistle Signals:

U. P. R. R. Junction—Main Line—1 long. U. P. R. R. Transfer No. 1—1 long, 1 short. U. P. R. R. Transfer No. 2—2 long, 1 short.

FORT WRIGHT-Whistle Signals:

Main Line, G. N. Ry.-1 short, 1 long.

Main Line, S. P. & S. Ry.-1 long, 1 short.

Siding, G. N. Ry.-2 long, 1 short.

Double track switch 20 feet East of Bridge 274 and derail on Westward main line 600 feet East of double track switch, electrically operated from Fort Wright Plant, and semaphore signals govern train movements over switches and derails.

Eastward trains stopped by semaphore signals governing dou-ble track switch and derail on East end of Bridge 274 communicate with Fort Wright operator, Westward trains communicate by phone located on East end of Bridge 274. If necessary to pass signal in Stop position derail and switch to be spiked before proceeding.

See Rule 605.

Second Subdivision.

Extra trains may use double track in the direction of current of traffic without running orders provided they secure proper clearance card Form A from Superintendent.

Only first class trains and passenger extras will register at Wenatchee.

Only C. M. St. P. & P. trains will register at Monroe.

Only N. P. trains will register at Snohomish.

Register shown at N. P. Junction is located in N. P. depot between N. P. Jct. and Delta, and is for use of N. P. trains only.

Register shown at Lowell Junction is located in C. M. St. P. & P. office, 32d St. and McDougall Ave., Everett, and is for use of C. M. St. P. & P. trains only.

First class trains register by card at Interbay.

The track between Berne and Scenic is controlled by a positive block in both directions and the automatic block signals at these points must not be passed except when displaying a clear indication or when authorized by train order to proceed. In case of loss of power or other emergency, a train in the tunnel may make a forward or a backward movement to Scenic or Berne without flag protection and may pass signals showing stop indication without stopping at a speed not to exceed eight (8) miles per hour.

High Voltage electric wires in electrified zone between Appleyard and Skykomish, in some places, will not clear man on top of train and train and enginemen must keep off cars and engines while passing through this territory except in emergencies and then use extreme caution.

All wires must be considered alive unless a clearance has been obtained from Operator at Skykomish Substation. Telegraph and telephone lines between Wenatchee and Skykomish located along highway. Extreme care must be used not to attempt to connect telephone apparatus to the high tension wires.

Delta (Freight Yard) 3.26 miles West of N. P. Jct.

Trains between N. P. Jct. and Delta will be governed by Northern Pacific Railway Time Table and Rules.

Trains may be moved against current of traffic through Seattle Tunnel only on written order on prescribed form properly filled out -Form 26 to be used for movement of westward trains against current of traffic and Form 26-A to be used for movement of east-ward trains against current of traffic.

The tracks between interlocking plant at North Portal and interlocking plant South Portal, Seattle tunnel, are controlled by positive block in both directions and the home signal must not be passed except when displaying proceed indication or when authoriz-ed by train order to proceed. A train in the block may make for-ward or backward movement to North Portal interlocking plant or South Portal interlocking plant without flag protection.

Track between Everett Junction and West switch Pacific Avenue is controlled by a positive block in both directions. The home signals must not be passed except when displaying proceed indication or when authorized by train order to proceed. A train in the block may make forward or backward movement without flag protection.

Monroe Junction is junction point with CMStP&P RR.

Snohomish Junction is junction point with N. P. Ry.

N. P. Junction is junction point with N. P. Ry.

Lowell Junction is junction point with CMStP&P RR.

At Snohomish N. P. trains will enter G. N. main track through cross-over. Eastward first class N. P. trains will leave G. N. main track through cross-over. Other than first class N. P. eastward trains will head in at Snohomish Jct.

At N. P. Jct. eastward trains from N. P. and first class westward trains for N. P. will move through cross-over.

Loaded log cars are handled over our line at overhead bridges, Snohomish, East of Monroe and East end of Skykomish yard. Enginemen approaching these overhead crossings should keep a close lookout for log trains so as not to pass under same while log train is on the overhead bridge.

FLAG STOPS.

Trains 1 and 2 stop at any station between Spokane and Seattle to pick up or discharge revenue passengers from or to points south of Shelby, and from or to points east of Havre, where Nos. 1 and 2 are scheduled to stop. Nos. 5 and 6 at Miller River, Baring and Startup.

No. 359 Mukilteo to Interbay to discharge passengers from Everett and points east and north.

No. 358 Edmonds for revenue passengers Mt. Vernon and North.

No. 355 at Edmonds to discharge passengers from North of Everett.

INTERLOCKING.

Whistle signals for tracks with switches controlled by interlocking at Everett Jct.:

Main track eastward one long. Coast Line eastward one long and one short.

The track between Everett Junction and the West Switch at Pacific Avenue is governed by interlocking signals controlled by the operator located at Everett Junction. Telephone located at West Switch Pacific Avenue, trainmen can communicate with Everett Junction when required.

Third Subdivision.

All trains arriving and leaving Vancouver and C. N. Junction will register in G. N. train order office, Vancouver.

Trains will not pass International Boundary at Blaine and White Rock without permission of Customs officials.

Normal position of switch at Still Creek is for southward trains and at Endot for northward trains.

Register at Delta for trains originating and terminating at this station.

INTERLOCKERS.

FRASER RIVER BRIDGE:

No train, engine, or cars shall be moved into or through the interlocking zone protecting the Fraser River bridge immediately south of New Westminster, B. C., through the use of flag, hand signal, lantern or word of mouth when the interlocking plant is out of order. The Government has provided regular clearance card to be used in cases of this kind and nothing else should be accepted.

DELTA JUNCTION:

All southward trains be governed by a two arm home signal located 700 feet north of draw span. Top arm at 90 degrees up proceed to two arm home signal located 20 feet north of N. P. crossing, top arm at 90 degrees up proceed to Bayside, lower arm 90 degrees up proceed to Delta yard.

Whistle signals for tracks with switches controlled from Delta Junction Interlocking Plant.

Main Line-One Long.

Delta Yard from North-One Long, One Short.

Delta Yard from South-Two Long, One Short.

Delta Yard North-Two Long.

Delta Yard South-Three Long. One Short.

Northward from Northern Pacific connection-One Long, One Short, One Long.*

Southward for Northern Pacific connection-One Long. One Short, Two Long.

Train movements from Bayside northward be governed by top arm of home signal.

Train movements from Delta northward be governed by top arm of home signal.

Trains between Delta and Bayside be governed by lower arm of home signal.

Trains northward from Northern Pacific connection to Great Northern main line governed by lower arm of home signal on Northern Pacific track. Top arm on advance home signal 500 feet south of draw span.

Southward trains for Northern Pacific connection to be governed by lower arm of home signal.

FLAG STOPS.

No. 360-Norman-Milltown-Blanchard and Ocean Park for passengers and at Crescent bridge for express shipments of oysters.

No. 359-One and one-fourth miles north of Samish and at Blanchard for express shipments of oysters.

No. 358-Stanwood and Ferndale for revenue passengers from Everett and South.

No. 355-Ocean Park.

SPEED RESTRICTIONS. All Trains

Over Street Crossings between South Bellingham depot and the Crossing just North Bellingham Freight depot. 10 M.P.H.

Over Fraser River Bridge, New Westminster...... 6 M.P.H.

- Between Mile Posts 123 and 127, between White Rock
- Over Brunette St., Sapperton and thru Blaine, Burling-
- Everett, over Bond St., Hewitt St., California St. and
- 24th St.

Following railroad crossings at grade protected by crossing gates, all trains approach and cross them at speed at 8 M.P.H.

- Burlington-G. N. Ry. Rockport Branch.

South Bellingham—N. P. Ry. Bellingham—C. M. St. P. & P. South of Pulp Mill.

MAXIMUM SPEED.

Between	Passenger	Freight
Delta Junction and Samish	55 M.P.H.	35 M.P.H.
Samish and Bellingham	40 M.P.H.	25 M.P.H.
Bellingham and Vancouver	50 M.P.H.	35 M.P.H.

MAXIMUM SPEEDS, ALL SUBDIVISIONS.

The trains with loaded cars of logs 20 miles per hour and must not move by standing or moving passenger trains.

Trains with steam derricks, pile drivers or ditchers....25 M.P.H. All trains with restricted speed where slides or falling rock likely to be encountered.

INSTRUCTIONS RELATING TO OPERATION INTERLOCKING PLANTS.

AUTOMATIC INTERLOCKING.

Interbay		0.98 miles wes	t with	Nor. Pa	ac. Ry.
		1.84 miles			
D. U. L.	ing. Crossing		With	1 B. C.	ERV

SEMI-AUTOMATIC INTERLOCKING.

New Westminster0.80 miles north New Westminster.

<u>ि</u> न

STANDARD INTERLOCKING RULES 601 TO 685, INCLUSIVE, SUPPLEMENTED BY THE FOLLOWING SHALL GOVERN IN THE USE OF THE AUTOMATIC INTERLOCKING PLANTS.

INTERBAY.

Trains on MAIN LINE will approach Home Signals under control and if PROCEED signal is obtained will proceed over the crossing at a speed of not to exceed fifteen miles per hour.

If train on main line is stopped at a Home Signal and no conflicting train movement is evident, trainman shall proceed to crossing and operate push button and slow hand release located in iron box marked "RELEASE" locked with standard switch lock. Turn knob to the right until stopped, hold a few seconds and let go. Clockwork movement will return pointer to the zero or NORMAL position after a period of from one to two minutes. Under ordinary conditions the completion of the return movement should cause home signal to indicate PROCEED. If home signal desired does not indicate PROCEED trainman may flag train over crossing after making certain that conflicting home signals are in the STOP position and no conflicting train movement is evident.

SWITCHING LEAD.

For train movements over the crossing on Great Northern switching lead, trainman shall proceed to the crossing and after making certain that no conflicting movement on the Northern Pacific is under way, shall operate PUSH BUTTON located in iron box marked PUSH BUTTON, which will, if indications are correct, cause Northern Pacific signals to assume STOP position, permitting Great Northern switching lead signal to indicate PROCEED after lapse of approximately one minute.

If the operation of the PUSH BUTTON for switching lead movements fails to obtain PROCEED signal, trainman shall operate PUSH BUTTON and SLOW HAND RELEASE located in iron box marked RELEASE locked with standard switch lock. After operations required in the RELEASE box have been performed the switching lead PUSH BUTTON must again be operated to obtain PROCEED signals.

If operation of SLOW HAND RELEASE and PUSH BUTTON does not clear the Home Signals desired, trainman at crossing, after having made certain that Home Signal on conflicting line are at STOP and no immediate train movement is evident, may signal train to PROCEED over the crossing.

B. C. E. RAILWAY CROSSING 1.84 Miles South of Still Creek.

If a train is stopped by a home signal and no immediate conflicting train movement is evident, trainman shall proceed to the crossing and operate hand release located in iron box marked "RE-LEASE" and locked with a standard switch lock. Turn knob to the right until stopped, hold a few seconds and let go. Clockwork movement will return pointer to zero or "NORMAL" position after a period of from one to two minutes. Under ordinary conditions the completion of the return movement should cause home signal to indicate "PROCEED."

If smash board on Great Northern route is in PROCEED position and operation of hand release does not clear the home signal desired, trainman may signal his train to proceed over the crossing, after making certain that home signals and smash boards on the B. E. Electric line are in stop position and no immediate conflicting train movement is evident. If smash board on Great Northern route is not in the PRO-CEED position and operation of hand release does not clear the home signal desired, trainman shall operate smash board to PRO-CEED position by hand and may then, if home signal desired does not clear, signal his train to proceed over the crossing, after making certain that home signals and smash boards on the B. C. Electric line are in STOP position and no immediate conflicting train movement is evident.

To Operate Smash Board Mechanism.

Located at the crossing, in an iron box marked "RELEASE," locked with a standard switch lock, is a crank for operation of smash board mechanism by hand. Crank should be taken out of box and inserted in shaft on back of operating mechanism after opening small door locked by a standard switch lock. Crank should be turned slowly and uniformly until movement has made its entire stroke and smash board has been moved to PROCEED position. Crank should then be removed and RETAINED UNTIL ENTIRE TRAIN HAS PASSED SMASH BOARD, when it must again be locked in the crank box.

NEW WESTMINSTER SEMI-AUTOMATIC. FRASER MILL SPUR CROSSING AND CROSSOVER TO WATERFRONT LINE.

Great Northern train movements over Fraser Mill spur crossing will be governed by manually operated gates. G. N. route over Fraser Mill spur crossing will be set manually after obtaining release of electric lock holding gates in STOP position.

Great Northern train movements from Main Line to Waterfront Line over C. P. R. crossing will be governed by indicator and electrically operated lock on main line switch stand. Great Northern route from main line to Waterfront Line over the C. P. R. crossing will be set manually after obtaining release of electric lock holding main line switch in normal position. Both ends of this long crossover are handled by the main line switch stand.

To unlock gates or switch, trainman shall open lock box locked with standard switch lock and if light indicator is burning, push operating button. If the semaphore indicator in the lock box indicates CLEAR at close of this operation, gates or switch may be unlocked by raising the handle under the indicator to the vertical position. Handle must be left in this position until gates or switch are closed after train movement is completed, when it must again be placed in the NORMAL position before door of the box can be locked.

If pushing the operating button does not bring about the above operation and no conflicting train movement on the C. P. R. is evident, trainman shall operate time release provided in box marked "RELEASE" and locked with a standard switch lock. Turn knob to the right until stopped, hold a few seconds and let go. Clockwork movement will return pointer to zero or NORMAL position after a period of from one to two minutes. Under ordinary conditions the completion of the return movement should release the electric lock as indicated by the Semaphore indicator.

SPECIAL RULES.

Rule 671 to 671 (f), inclusive, amended as follows:

The speed of trains through the Approach and Home signal zones of an interlocking plant shall not exceed thirty miles per hour.

Trains moving against the current of traffic on double track through interlocking plants, or where governed by dwarf signals shall not exceed eight miles per hour.

Conditions may require a further speed restriction for all trains, per special rules, and at draw bridges the speed of trains shall not exceed eight miles per hour.

The letter "I" in column headed "SIGNS" indicates interlocking plant.
