VACUUM CLEANERS ON ORIENTAL LIMITED

THE Great Northern Railway has introduced another innovation on its transcontinental train between St. Paul and the Pacific Coast. Vacuum cleaning machines are now used to keep the cars spick and span. The time honored broom has been relegated to a dark corner of the porter's locker and its functions hereafter will be performed by a machine in charge of a skilled operator. The apparatus comprises a vacuum pump driven by an electric motor and a metallic reservoir for receiving the dirt. The machine is mounted on wheels and is taken from car to car. There are special attachments for taking the dust out of upholstery, curtains and draperies, as well as from the carpets. The machine is a part of the train equipment and a uniformed operator has been added to the train crew; his only duties being to keep the cars neat and clean.
